

subject: **Changes to enter/change/verify bsc3270 terminal**

date: **October 21, 1996**

from: **BNS-2000 Customer Support  
1800WE2CARE**

*PRODUCT DOCUMENTATION NOTICE*

This memo describes changes made to the **enter bsc3270 terminal**, and **change bsc3270 terminal** commands in BNS-2000.

A new prompt for enter and change for non-Receive Only terminal has been added as follows:

*If SERVICE TYPE is terminal and RECEIVE-ONLY is no:*

TERMINAL SECURITY ON? [yes, no: +(no)]:

This new prompt appears after:

FORWARD DELIVERY ACKNOWLEDGEMENT? [yes, no: +(no)]:

The description of the prompt TERMINAL SECURITY ON in the **Parameters** section for **enter bsc3270 terminal** should read as follows:

If TERMINAL SECURITY ON is yes, it specifies whether the BTIM is to respond to receiving a Device Available Status and Sense Message (B, SP) from a non-Receive Only device when there is no pending error condition as indicated by a prior Status and Sense Message. When yes is specified, the Device Available Status and Sense Message (B, SP) causes the BTIM to take down the user call.

The *verify bsc3270 terminal* command was also modified. There is a new field "TERM SECR". "yes" indicates the option to disconnect the terminal is on, "no" indicates the option to disconnect the terminal is off, and "N/A" indicates the terminal is a receive only and this option is not applicable. Below is an example of the updated verify report.
